

MiPrimerMarkdown

#Argumentos por defecto Recuerda eco muestra result #Pero no muestra el codigo ## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>. $f(x) = 2x$

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this: include me dice si el chunk se muestra o no, eval me dice si el codigo que pongo dentro se ejecuta o no se ejecuta. Puedes escoger el lenguaje

```
x=2  
print(x)
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
